

EVOGEN ACCEL

a ready to use high bacterial count liquid formulated with selected bacillus strains for the degradation of municipal wastes high in proteins, carbohydrates, cellulosic material, fats, oils and greases.

overview

A ready to use high bacterial count liquid formulated with selected bacillus strains for the degradation of municipal wastes high in proteins, carbohydrates, cellulosic material, fats, oils and greases. This product is a bacterial broth that contains no surfactants, no fragrance and no dyes.

advantages of EVOGEN ACCEL

optimized proprietary bacterial consortium degrades a broader spectrum of substrates

contains only EPA registered, highly effective preservatives

readily biodegradable components offer reduced environmental impact.

eliminates malodors at source

effectively formulated using minimal levels of buffering agent, giving excellent product stability and improved shelf life

can be used effectively in typical further compounding applications

manufactured under strict quality control standards to ensure high quality and purity

reduces BOD/COD/FOG

improves settlement and stabilizes activated sludge

applications

- municipal wastewater treatment plant
- industrial wastewater treatment plants
- animal waste collection
- ponds and water gardens
