evozyme

ADVANCED BIOLOGICAL LIQUID FORMULATIONS

EVOZYME MULTIPURPOSE E CONCENTRATE 10X

a liquid bacterial solution fortified with enzymes to accelerate the degradation process and formulated with an non-ionic surfactant to increase dispersion

overview

Enzymes and bacteria form a powerful combination which is able to breakdown waste quickly. By adding an enzyme to the bacterial formulation, large particles of organic matter can be broken down for the bacteria. The result is a fast acting formula.

To increase the wetability, cleaning and degreasing properties, the Evozyme Multipurpose E Concentrate 10x is formulated with a non-ionic surfactant. Non-ionic surfactants provide the most detergency and facilitate dispersion, thus making the Evozyme Multipurpose E Concentrate 10x an excellent choice when degradation power must be combined with increased dispersion properties.

applications

To develop formulations for:

- grease traps and drain maintenance
- hard surface cleaners
- septic tank treatments
- carpet and fabric cleaners
- odor control
- pet and livestock
- rv, portable & chemical toilets
- liquid & compost accelerator
- wastewater treatment

technical features of EVOZYME MULTIPURPOSE E CONCENTRATE 10X

- extensive stability and shelf life
- broad spectrum organic degradation
- unlimited packaging options
- simply dilute, package and sell
